

# Operating Guidelines

Section: Fireground Procedures

Subject: Wildland

Number: 911

Date Issued: August 3, 2010

Date Revised: October 3, 2017

## Guidelines

### 911.1

Night time Wildland Fire Operations should be avoided unless exposure protection is required.

### 911.2

Incident Command is responsible for making contact with MNR suppression resources.

### 911.3

All attempts shall be made to remove fire suppression personnel from a water bomber drop zone, prior to the water being dropped.

### 911.4

Suppression crews entering a wildland fire area shall always maintain a safe means of egress and an alternate means of egress.

### 911.5

IC shall be responsible to have an awareness of the area of topography and weather conditions to ensure the safety of fire fighting personnel.
